

# THE *Quilter's* PLANNER

## *Riot of Color* PLANNER COVER PANEL

BY KITTY WILKIN OF NIGHT QUILTER

This pattern includes tutorials for creating the outer panel for either the Zippy Quilter's Planner Cover pattern (page 2) or the 45-Minute Planner Cover by Leslie Meltzer (page 4).

# Riot of Color panel

## FOR THE ZIPPY QUILTER'S PLANNER COVER PATTERN

This tutorial is for creating the outer panel for the Zippy Quilter's Planner Cover pattern customized by Stephanie (Late Night Quilter) and Amanda (What the Bobbin) for the Quilter's Planner. This tutorial will provide cutting and piecing instructions for the outer panel (20¾"W x 11"H). From there, follow the instructions in the Zippy Quilter's Planner Cover pattern found at [QuiltersPlanner.com](http://QuiltersPlanner.com) to make the full zippy planner cover, using this 20¾" x 11" panel as the "exterior fabric".

The secret to this cover's creation is the fabric choices. The dark grey of the Essex linen in Charcoal (Robert Kaufman Fabrics) lets the bright bold colors of Alison Glass's Sun Print 2016 and Art Theory panel in Charcoal (from Ex Libris - Andover Fabrics) shine. This could also be made using a favorite large-scale print for the feature fabric and fussy cut bits for the squares, but be sure to use a contrasting solid or reads-as-solid background fabric so that the construction shines.

### PATTERN NOTES

Seam allowances are ¼" throughout unless indicated otherwise. I like to press seams open, but in some cases I pressed to the side for this project. I will note those places in this tutorial. All measurements are given as width x height (length).

### MATERIALS

Featured Fabric – 11¼" x 11"

Background Fabric – 1 FQ

Colorful Squares – 16 scraps measuring at least 1½" x 1½"

### CUTTING

First, cut all of your fabric pieces according to the Cutting Requirements chart and diagram. Measurements are listed as width x height (length).

#### A Note About the D/E Pieces

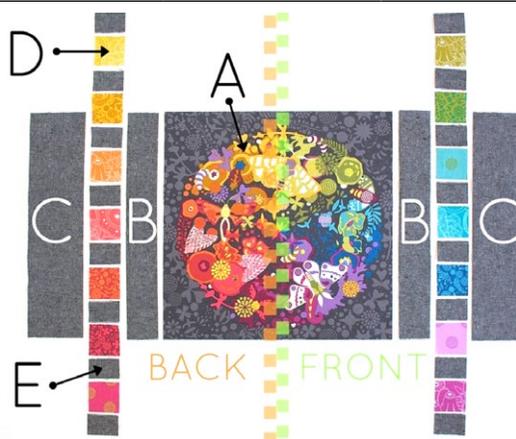

Here's where I'm going to be real with you. The D/E strips have a lot of seams. This means that if your ¼" seam allowance is off by even a little bit, your strip may be slightly the wrong size. In the cutting chart above, I've accounted for this human error. (You're welcome!)

**IF** your seams are an absolute perfect ¼" and your cutting is precise, the top and bottom E pieces on both strips (four E pieces total) only need to measure 1½" x ¾".

This tutorial allows you to trim the excess at the end so that you don't have to worry as much about the precision of your ¼" seam. That said, focus on straight, consistent seams and we will adjust for scant or generous seams during the process! If you feel like you want to be a Perfect Seams Superhero and save yourself some math and cutting, use 1½" x ¾" E pieces on the top and bottom of each strip. Go ahead and cut your pieces.

#### Cutting Requirements

Piece	# pieces	Size
A	1	11¼" x 11"
B	2	1½" x 11"
C	2	3¼" x 11"
D	14 (7 front, 7 back)	1½" x 1½"
E	16	1½" x 1"

Ready? Lay it all out how you want it and then start assembling!

## ASSEMBLY

Pair each D piece right sides together with an E piece and sew with a  $\frac{1}{4}$ " seam allowance. I like to get them all ready and then chain piece to save time.

**Organization Tip:** *Be sure to take a photo of your layout before sewing so that you have a visual reference along the way!*

Set seams and press open. Lay them out again and check your reference photo. There should be one E that has not yet been paired and sewn. Pair and sew components of the D/E strips until they are completely assembled. Press seams open.

If you are being a Perfect Seams Superhero today and used  $1\frac{1}{2}$ " x  $\frac{3}{4}$ " E pieces on the tops and bottoms of your strips, confirm that your fully assembled strip now measures  $1\frac{1}{2}$ " x 11", pat yourself on the back and skip ahead to the full panel piecing.

If you are being merely human today, give your strips a good press and lay them on your cutting mat. It's time to measure how much excess you have and take care of it.

We want the finished strips to measure 11" long, but we want to be sure our colorful bits stay centered. To do this, take the following steps (the example shown is in parentheses):

1. Measure each strip to the nearest  $\frac{1}{8}$ " being sure to press it flat so that it extends to its full length. (My strips shown measured  $11\frac{1}{2}$ " when I held them flat.)

2. Take the difference of 11" from the length of your strip. ( $11\frac{1}{2} - 11 = \frac{1}{2}$ " )

3. Divide the difference by 2. ( $\frac{1}{2} / 2 = \frac{1}{4}$ " )

4. That's how much you should trim from each end of your strip. (I trimmed  $\frac{1}{4}$ " from each end)

Now, measure your strips again. Each strip should measure  $1\frac{1}{2}$ " x 11". Don't worry about a little wobble or wonk at this point. Everything will be smoothed out during the final assembly!

Next, we will piece the rest of the panel.

Lay out all of your pieces again as shown (left to right): C, D/E strip, B, A, B, D/E strip, C.

Sew them together!

Here's the order in which I assembled it, but do what works logically for you.

1. Right sides together, sew B pieces to A. Press seams open. This is the B/A/B unit.

2. Right sides together and double-checking the orientation of the D/E strips, sew C outer pieces to D/E strips. Press toward C. These are your D/E/C units.

3. Sew D/E/C units to the B/A/B unit, pressing seams toward B/A/B.

Give your panel a good press, check that it measures  $20\frac{3}{4}$ " x 11" and trim if needed.

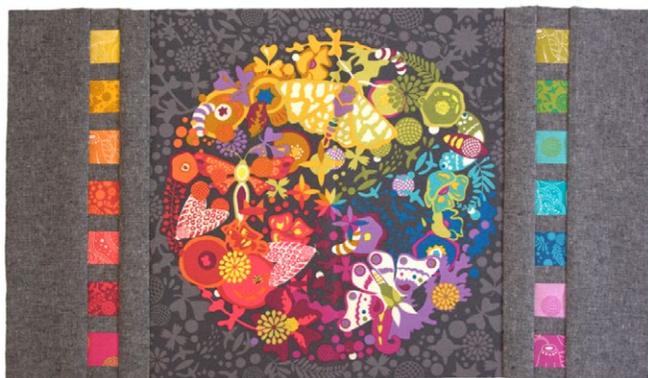

From here, head over to the Zippy Quilter's Planner Cover tutorial by Amanda and Stephanie to complete your planner cover! Use this Riot of Color panel as the "exterior fabric".

# Riot of Color panel

## FOR THE 45-MINUTE PLANNER COVER PATTERN

This tutorial is for creating the outer panel for the 45-Minute Planner Cover pattern by Leslie Meltzer for the Quilter's Planner. This tutorial will provide cutting and piecing instructions for the outer panel (21"W x 11½"H). From there, follow the instructions in the 45-Minute Planner Cover pattern found at <http://quiltersplanner.com> to make the full 45-Minute Planner Cover, using this 21" x 11½" panel as the "exterior fabric".

The secret to this cover's creation is the fabric choices. The dark grey of the Essex linen in Charcoal (Robert Kaufman Fabrics) lets the bright bold colors of Alison Glass's Sun Print 2016 and Art Theory panel in Charcoal (from Ex Libris - Andover Fabrics) shine. This could also be made using a favorite large scale print for the feature fabric and fussy cut bits for the squares, but be sure to use a contrasting solid or reads-as-solid background fabric so that the construction shines.

### PATTERN NOTES

Seam allowances are ¼" throughout unless indicated otherwise. I like to press seams open, but in some cases I pressed to the side for this project. I will note those places in this tutorial. All measurements are given as width x height (length).

### MATERIALS

Featured Fabric – 11½" x 11½"

Background Fabric – 1 FQ

Colorful Squares – 16 scraps measuring at least 1½" x 1½"

### CUTTING

First, cut all of your fabric pieces according to the Cutting Requirements chart and diagram. Measurements are listed as width x height (length).

### A Note About the D/E Pieces

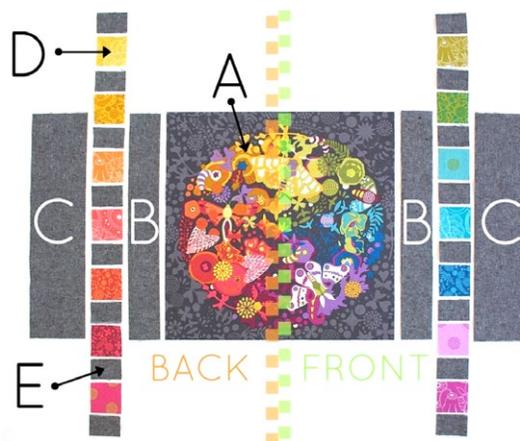

Here's where I'm going to be real with you. The D/E strips have a lot of seams. This means that if your ¼" seam allowance is off by even a little bit, your strip may be slightly the wrong size. In the cutting chart above, I've accounted for this human error. (You're welcome!)

**IF** your seams are an absolute perfect ¼" and your cutting is precise, the top and bottom E pieces on both strips (four E pieces total) only need to measure 1½" x 1".

This tutorial allows you to trim the excess at the end so that you don't have to worry as much about the precision of your ¼" seam. That said, focus on straight, consistent seams and we will adjust for scant or generous seams during the process! If you feel like you want to be a Perfect Seams Superhero and save yourself some math and cutting, use 1½" x 1" E pieces on the top and bottom of each strip. Go ahead and cut your pieces.

### Cutting Requirements

Piece	# pieces	Size
A	1	11½" x 11½"
B	2	1½" x 11½"
C	2	3¼" x 11½"
D	14 (7 front, 7 back)	1½" x 1½"
E	12 4*	1½" x 1" 1½" x 1¼"

Ready? Lay it all out how you want it and then start assembling! \*Note: The larger, 1½" x 1¼" squares will be at the top and bottom of each of the D/E strips.

## ASSEMBLY

Pair each D piece right sides together with an E piece\* and sew with a 1/4" seam allowance. \*Don't forget to use the 1 1/2" x 1 1/4" squares at the top and bottom of each strip.

I like to get them all ready and then chain piece to save time.

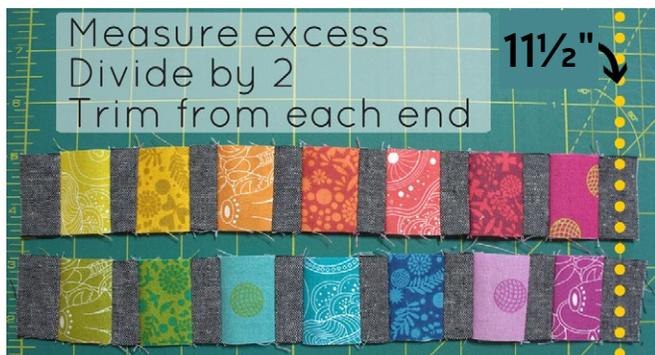

**Organization Tip:** Be sure to take a photo of your layout before sewing so that you have a visual reference along the way!

Set seams and press open. Lay them out again and check your reference photo. There should be one E that has not yet been paired and sewn. Pair and sew components of the D/E strips until they are completely assembled. Press seams open.

If you are being a Perfect Seams Superhero today and used 1 1/2" x 1" E pieces on the tops and bottoms of your strips, confirm that your fully assembled strip now measures 1 1/2" x 1 1/2", pat yourself on the back and skip ahead to the full panel piecing.

If you are being merely human today, give your strips a good press and lay them on your cutting mat. It's time to measure how much excess you have and take care of it.

We want the finished strips to measure 1 1/2" long, but we want to be sure our colorful bits stay centered. To do this, take the following steps (the example shown is in parenthesis):

1. Measure each strip to the nearest 1/8" being sure to press it flat so that it extends to its full length. (My strips shown measured 12" when I held them flat.)

2. Take the difference of 1 1/2" from the length of your strip. (12" - 1 1/2" = 10 1/2")

3. Divide the difference by 2. (10 1/2" / 2 = 5 1/4")

4. That's how much you should trim from each end of your strip. (I trimmed 1/4" from each end)

Now, measure your strips again. Each strip should measure 1 1/2" x 1 1/2". Don't worry about a little wobble or wonk at this point. Everything will be smoothed out during the final assembly!

Next, we will piece the rest of the panel.

Lay out all of your pieces again as shown (left to right): C, D/E strip, B, A, B, D/E strip, C.

Sew them together! Here's the order in which I assembled it, but do what works logically for you.

1. Right sides together, sew B pieces to A. Press seams open. This is the B/A/B unit.

2. Right sides together and double-checking the orientation of the D/E strips, sew C outer pieces to D/E strips. Press toward C. These are your D/E/C units.

3. Sew D/E/C units to the B/A/B unit, pressing seams toward B/A/B.

Give your panel a good press, check that it measures 21" x 11 1/2" and trim if needed.

From here, head over to the 45-Minute Planner Cover tutorial to complete your planner cover! Use this Riot of Color panel as the "exterior fabric".

## ABOUT THE DESIGNER

Kitty Wilkin is a stay at home mom of three littles, wife, sewist of quilts and other beautiful things, knitter, gardener, yogi, and all-in-all lover of life. With three little kids, her only sewing time is after bedtime. Thus the night quilter was born. She blogs at [NightQuilter.com](http://NightQuilter.com) and can also be found on Instagram: @nightquilter, Twitter: @nightquilter and Facebook: Facebook.com/nightquilter
